

Compact ammonia burners for industrial furnaces

September 17, 2026

The agency announced a programme to develop compact ammonia burners for industrial furnaces, cutting CO₂ from heat. ¹

Background

Ammonia carries hydrogen without the cost of liquefaction and can be burned directly.

Programme outline

Budget	2 billion yen
Period	From fiscal 2026 to fiscal 2029, with a review at the halfway point.
Partners	Three universities

Goals:

- Halve the burner volume
- Keep NO_x under the current limit

¹ Measured against a gas burner of the same output.
